PERSONAL STATEMENT

I am a passionate software developer with experience building scalable web applications and leading development teams. I enjoy solving complex problems and delivering high-quality software that drives business value. Skilled in fullstack development, cloud technologies, and Agile methodologies, I am committed to continuous learning and contributing to innovative projects. I thrive in collaborative environments where I can mentor others and tackle challenging technical problems.

WORK EXPERIENCE

Google

Jan 2024 - Present

Staff Software Engineer

- Architected and led the development of a new real-time data processing platform, reducing latency by 70%.
- Mentored a team of 10 engineers, fostering a culture of high performance and continuous improvement.
- Drove cross-organizational initiatives to standardize API design and security protocols across multiple products.
- Optimized cloud infrastructure costs, saving the department over \$2M annually through resource management.

Microsoft

Feb 2020 - Dec 2021

Fullstack Developer

- Built new features for internal tools used by 10,000+ employees, improving operational efficiency.
- Implemented comprehensive CI/CD pipelines using Azure DevOps, reducing deployment failures by 60%.
- Mentored junior developers and conducted code reviews to maintain high code quality standards.
- Modernized legacy front-end codebases from jQuery to React and TypeScript, enhancing maintainability.

EDUCATION

Harvard University

Sep 2014 - Jun 2017

BSc (Hons) Software Development

- Graduated with First-Class Honours (Summa Cum Laude).
- Won multiple hackathons, including the Ivy League 'CodeFest 2016' for a project on sustainable tech.
- Final-year dissertation on distributed computing and data scalability in peer-to-peer networks.

Stanford University

Sep 2018 - Jun 2020

MSc in Computer Science (AI Specialization)

- Thesis on 'Efficient Reinforcement Learning Models for Autonomous Systems,' published at NeurIPS.
- GPA: 3.9/4.0, awarded the AI Research Excellence Scholarship.
- Teaching Assistant for 'CS229: Machine Learning,' leading weekly discussion sections for 100+ students.

Deep Learning Specialization

2021

Coursera / deeplearning.ai

- Completed a 5-course specialization covering Neural Networks, Hyperparameter Tuning, and Sequence Models.
- Implemented and trained deep neural networks for computer vision and NLP tasks using TensorFlow.

SKILLS

Programming Languages

- Python, Go, TypeScript/JavaScript, Rust, Java, C++, SQL, Scala, Shell Scripting

Frameworks and Tools

- React, Next.js, Vue.js, Svelte, GraphQL (Apollo/Relay), Webpack, Vite, TailwindCSS, D3.js

PROJECTS

Open Source Analytics Dashboard

2023

Personal Project

- Built a full-featured analytics dashboard using Next.js, FastAPI, and PostgreSQL.
- Gained over 1,500 stars on GitHub and contributions from 10+ developers.
- Packaged for easy deployment using Docker and Helm charts for Kubernetes.

Serverless ETL Pipeline for IoT Data

2022

Personal Project

- Architected and built a serverless pipeline on AWS using Lambda, Kinesis, and S3 for real-time IoT data.
- Transformed and aggregated data, loading it into Redshift for business intelligence and analysis.
- The architecture supports ingestion of over 100,000 events per second with high availability.

Real-time Collaborative Whiteboard

2021

Personal Project

- Developed a web application allowing multiple users to draw and brainstorm in real-time.
- Utilized WebSockets for low-latency communication and React with Canvas API for the interface.
- Deployed on a serverless architecture using AWS Lambda and API Gateway for cost-effective scaling.

Rust-based CLI Tool for Code Analysis

2023 - Present

Open Source Contribution

- Contributed core features to a popular open-source static analysis tool written in Rust.
- Implemented a new parsing engine that improved performance by 300%.
- Now a core maintainer, responsible for reviewing PRs and planning the project roadmap.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

2024

The Linux Foundation

- Validated skills in production-level Kubernetes management, networking, and security.

AWS Certified Solutions Architect -

Professional

2023

Amazon Web Services

- Demonstrated advanced ability to design and deploy scalable, fault-tolerant applications on AWS.

Google Cloud Professional Cloud Architect

2023

Google Cloud

- Mastered designing, developing, and managing robust and secure solutions on GCP.

HashiCorp Certified: Terraform Associate

2022

HashiCorp

- Certified in Infrastructure as Code (IaC) principles and best practices using Terraform.

Certified Information Systems Security

Professional (CISSP)

2024

(ISC)²

- Achieved a globally recognized standard of competence in information security.
